### Experience

OHI works with your team to provide customized UXO support to ensure your project is conducted safely. Our UXO technicians are trained to identify explosives safety hazards and implementing measures to avoid hazards. Handheld and bore-hole magnetometer assisted avoidance is available to support studies on ranges where UXO is present.

- **Environmental Study Experience:** Fort Meade, MD – OHI escorted USFWS Personnel during an biological/environmental study
- **Construction Support Dredging:** Fort Story, VA – OHI provided 24-7 support to a beach replenishment project (1M cubic yards of sand)
- **Downhole Avoidance:** NSWC Indian Head MD – OHI provided borehole anomaly avoidance for environmental sampling effort
- **Range Assessment:** Camp Shelby, MS – OHI provided UXO avoidance support for a range assessment
- **Archeological Studies:** Fort Sill, OK – OHI escorted an archeological team on active ranges with UXO

### Project Example

OHI provided UXO/MEC Construction Support to Fort Story Beach Replenishment Project - VA. Scope included 24-7 around the clock support. Approximately 1M cubic yards of sand were dredged.
