- **Conceptual Design:** Engineering analysis and concept exploration
- **Design:** Robust 3-D design work in Solid Works and Auto-Cad
- **Prototyping:** Fabrication of prototype components and systems
- **Test & Evaluation:** Systems performance testing against project specifications
- **Documentation:** Report documentation & development of technical specifications

Experience

Our engineers and designers have direct experience developing and testing tools and equipment for military projects. Direct experience includes supporting the Naval EOD Technology Division, the Technical Support Working Group (TSWG), and the Joint IED Defeat Office.

Project Example

HOLLEY STICK

Our experts provided technical engineering & design support for the Holley Stick Buried Command Wire Recovery Tool designed for the Marine Corps.
